

# Neuroscience Research Reagents

*Quality Products and Quality Customer Support*

## Biosensis, an Australia – USA Partnership

Biosensis is a worldwide supplier of innovative antibodies, immunoassays, proteins, tracing kits, immunotoxins and specialty buffers. Our products are used by academic researchers and biotech/ pharmaceutical laboratories to assist basic and applied research on diseases and drug development.

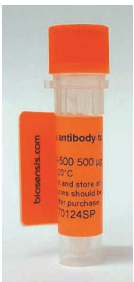

## We are The Neuroscience Specialists!

Biosensis specializes in neuroscience products and their application in research of brain diseases. Other areas of expertise include Stem Cell Research, Cancer Research and Autophagy.

## Biomarker Analysis with *Rapid*<sup>™</sup> ELISA Kits

Research-Use-Only and CE-marked ELISA Kits are available to quantify brain-related proteins in tissue and body fluid samples, especially blood. The target proteins have been chosen because of their potential as sensitive disease *biomarkers*, thus encouraging their use in academic and industry pre-clinical and clinical drug trials.

## High Quality Monoclonal and Polyclonal Antibodies

Biosensis offers over 1,200 well-characterized primary antibodies, used in various immunological techniques, such as Immunohistochemistry, Western Blotting, Biological Inhibition and Flow Cytometry.

## Customer Support Matters to Us!

We offer unparalleled technical support and development services for antibodies and ELISA Kits. All of our PhD-grade level Scientists have extensive lab bench experience, understanding the need for “Reagents that Work”. We will support you to get the best out of our products!

## Why Trust Biosensis Products?

We have been supplying major life science companies with antibodies for more than 30 years. This means we are the original manufacturer that generates and validates antibodies. This long-standing partnership gives evidence of continuous high quality products!
