

Rabbit polyclonal antibody to human FAS-associated factor 1 (1-22): Affinity purified

Catalogue No.:	R-1461-100
Description:	FAS-associated factor 1 (FAF1) interacts with the cytoplasmic domain of FAS and potentiates but cannot initiate FAS-induced apoptosis (Ref: SWISSPROT).
Batch No.:	See product label
Unit size:	100 ug
Antigen:	A synthetic peptide corresponding to a region (1-22 aa) from the N-terminus of human FAS-associated factor 1 (FAF1).
Antigen Location:	1-22 aa
Other Names:	FAS-associated factor 1; hFAF1; UBX domain-containing protein 12; UBX domain-containing protein 3A; FAF1; UBXD12; UBXN3A;
Accession:	Q9UNN5 FAF1_HUMAN;
Produced in:	Rabbit
Applications:	Western Blotting (WB). A concentration of 1.0 ug/mL is recommended for WB. Human FAF1 (Isoform Long) has a predicted length of 650 amino acids and MW of 74 kDa. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	The specificity of this antibody has been confirmed by WB against the antigen.
Antibody Against:	FAS-associated factor 1
Cross-reactivity:	Human; rat; predicted to react with mouse due to sequence homology;
Form:	Lyophilised with 5mg BSA, 0.9mg NaCl, 0.2mg Na ₂ HPO ₄ , 0.05mg Thimerosal, 0.05mg NaN ₃
Appearance:	White powder
Reconstitution:	Reconstitute in 100 uL of sterile distilled water to achieve an antibody concentration of 1 mg/mL. Centrifuge to remove any insoluble material.
Storage:	At least 12 months after purchase at 2-8C (lyophilized formulations). After reconstitution, aliquot and store at -20C for a higher stability. Avoid freeze-thaw cycles.
Expiry Date:	12 months after purchase
