

Chicken polyclonal antibody to Peroxisome proliferator-activated receptor gamma (115-129): Affinity purified

Catalogue No.:	C-1533-100
Description:	Peroxisome proliferator-activated receptor gamma (PPARG) is a nuclear hormone receptor that binds peroxisome proliferators such as hypolipidemic drugs and fatty acids. Once activated by a ligand, the receptor binds to a promoter element in the gene for acyl-CoA oxidase and activates its transcription (Ref: SWISSPROT).
Batch No.:	See product label
Unit size:	100 uL
Antigen:	Human Peroxisome proliferator-activated receptor gamma peptide (115-129 aa).
Sequence:	YYSEKTQLYNKPHEE
Other Names:	PPAR gamma; PPAR-gamma; Nuclear receptor subfamily 1 group C member 3; PPARG; NR1C3;
Accession:	P37231 PPARG_HUMAN;
Produced in:	Chicken
Applications:	WB. Suggested dilution at 1:2,000 to 1:5,000. Biosensis recommends that the optimal working dilution should be determined by the end user.
Cross-reactivity:	Human
Form:	Liquid. PBS with 0.02% Sodium Azide
Storage:	Short term storage at 2-8C for one week. At -20C as an undiluted liquid for up to 12 months.
Expiry Date:	12 months after purchase
