

Mouse monoclonal antibody to human AHNAK nucleoprotein [3G7]: IgG

| | |
|--------------------------|---|
| Catalogue No.: | M-824-100 |
| Batch No.: | See product label |
| Unit size: | 100 ug |
| Antigen: | Partial recombinant human AHNAK protein (1-101) with a GST tag. |
| Clone: | 3G7 |
| Other Names: | Desmoyokin; AHNAK |
| Accession: | A1A586_HUMAN |
| Produced in: | Mouse |
| Purity: | IgG purified monoclonal antibody. |
| Applications: | This antibody is recommended for use in WB , direct ELISA and sandwich ELISA. Biosensis recommends optimal dilutions/concentrations should be determined by the end user. |
| Specificity: | The specificity of this antibody was demonstrated by WB against the recombinant protein. |
| Cross-reactivity: | This antibody has not yet been tested against other species. |
| Form: | Lyophilised from PBS pH 7.2, 150mM NaCl. |
| Reconstitution: | Reconstitute with 100 uL of sterile water. Centrifuge to remove any insoluble material. |
| Storage: | After reconstitution keep aliquots at -20C for a higher stability, and at 2-8C with an appropriate antibacterial agent. Glycerol (1:1) may be added for an additional stability. Avoid repetitive freeze/thaw cycles. |
| Expiry Date: | 12 months upon purchase. |

Detection of the partial AHNAK recombinant protein in transfected 293T cell lysates with the mouse monoclonal antibody to human AHNAK nucleoprotein [3G7], catalogue number M-800-100. This antibody detects a 16kDa band (lane 1) corresponding to the expressed recombinant partial human AHNAK protein. The antibody is not-reactive with non-transfected lysate (lane 2).
