

## Mouse monoclonal antibody to human CRIM1 [6E4]: IgG

- Catalogue No.:** M-817-100
- Batch No.:** See product label
- Unit size:** 100 µg
- Antigen:** A partial recombinant human CRIM1 protein (amino acids 36 to 145) with a GST tag.
- Other Names:** Cysteine-rich motor neuron 1 protein, cysteine-rich repeat-containing protein S52, GENE NAME: CRIM1
- Produced in:** Mouse
- Purity:** Protein G purified immunoglobulin
- Applications:** This antibody is recommended for IHC at a dilution of 3 µg/ml. It is also recommended for sandwich ELISA with a detection limit for the recombinant GST tagged CRIM1 protein of 0.03 ng/ml. This antibody is useful for WB analysis. Note optimal dilutions should be determined by the end user.
- Specificity:** The specificity of this antibody has been confirmed by WB and ELISA against the antigen.
- Cross-reactivity:** No other species have been tested.
- Form:** Lyophilised mouse IgG in phosphate buffered saline, pH7.2
- Reconstitution:** Reconstitute in 100 µl of sterile water. Centrifuge to remove any insoluble material.
- Storage:** After reconstitution keep aliquots at -20°C for higher stability or at 4°C with an appropriate antibacterial agent. Glycerol (1:1) may be added for additional stability. Avoid repetitive freeze/thaw cycles.
- Expiry Date:** 12 months after purchase

Immunohistochemical detection of CRIM1 in formalin-fixed paraffin-embedded human lung tissue using mouse monoclonal antibody to human CRIM1 (M-817-100) at a concentration of 3 µg/ml.
