

Mouse monoclonal antibody to Nitric Oxide Synthase [N1]: IgG

Catalogue No.:	M-989-100
Description:	Nitric oxide synthase (NOS) catalyses the formation of nitric oxide, an important messenger molecule in functions such as homeostasis and synaptic plasticity. NOS is classified into three types: (1) neuronal NOS (nNOS) or brain NOS (bNOS) (2) inducible NOS (iNOS) or macrophage NOS (mNOS) and (3) endothelial NOS (eNOS).
Batch No.:	See product label
Unit size:	100 ug
Antigen:	A recombinant neuronal NOS fragment from rat brain.
Clone:	N1
Other Names:	neuronal NOS; nNOS; brain NOS; bNOS; NOS type 1; NOS1; NC-NOS; Constitutive NOS;
Accession:	P29475 NOS1_HUMAN; P29476 NOS1_RAT;
Produced in:	Mouse
Purity:	IgG
Applications:	Western Blotting (WB). A concentration of 0.5 ug/mL is recommended for WB. Human NOS (nNOS-1) has a predicted length of 1,434 residues and MW of 161 kDa. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	The specificity of this antibody has been confirmed by WB against the antigen.
Cross-reactivity:	Human; rat; goat; pig;
Form:	Lyophilized from 1.2% sodium acetate, 2mg BSA, 0.01mg NaN ₃
Reconstitution:	Reconstitute in 1 mL of PBS (pH 7.4) to achieve an antibody concentration of 100 ug/mL. Centrifuge to remove any insoluble material.
Storage:	At least 12 months after purchase at 2-8C (lyophilized formulations). After reconstitution, aliquot and store at -20C for a higher stability. Avoid freeze-thaw cycles.
Expiry Date:	12 months after purchase

Neuronal Nitric Oxide Synthase (nNOS) immunoreactivity was detected in floated cryo-sections of the rat hypothalamus with the M-989-100 monoclonal antibody (0.2 µg/ml), using the biotinylated secondary antibody-ABC method and nickel-diaminobenzidine chromogen. Intensely labeled nNOS-immunoreactive neurons occur in high numbers in the caudal part of the hypothalamic paraventricular nucleus.
