

Non-specific Control IgG, clone X63 (Monoclonal)

Catalogue No.:	M-1249-100
Batch No.:	See product label
Unit size:	100 ug
Antigen:	None. This control IgG has no known binding ability.
Isotype:	IgG1, kappa light chain
Clone:	X63
Produced in:	Culture from mouse Myeloma cells.
Purity:	Immunoglobulin purified using Protein G column. Purity analysed using gel electrophoresis.
Applications:	Recommended for use as a control for Western Blotting, immunohistochemistry and FACS at a concentration equal to that of the test antibody. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	No staining has ever been identified with this immunoglobulin demonstrating its non-specific value as a control.
Cross-reactivity:	N/A
Form:	Lyophilised
Storage:	Store lyophilized antibody at 2-8C. Keep reconstituted antibody at -20C to -80C for long-term storage. For short term keep at 2-8C. We suggest that the customer aliquots the antibody into smaller lots to avoid repeated freezing and thawing.
Expiry Date:	12 months
