

## Human Matrix metalloproteinase-2 ELISA Kit (2 plates)

<b>Catalogue No.:</b>	BEK-2067-2P
<b>Description:</b>	The human Matrix metalloproteinase-2 (MMP-2) Kit is a sandwich ELISA. The capture antibody is a polyclonal human MMP-2 antibody pre-coated onto the 96-well strip plates provided in the kit. Human test samples and standards of known MMP-2 concentration are added to these wells and allowed to complex with the bound MMP-2 antibody. A biotinylated human MMP-2 polyclonal antibody is then added. This detection antibody binds to the antigen thus completing the sandwich. After washing, an enzyme Avidin-Biotin-Peroxidase complex (ABC) is added which binds to the second antibody. The peroxidase substrate TMB is added to induce a coloured reaction product. The intensity of this coloured product is directly proportional to the concentration of MMP-2 present in the samples. The purpose of this kit is the in-vitro quantitative determination of human MMP-2 in samples such as sera, plasma, tissue lysates and cell culture supernates. This kit has been configured for research use only and is not to be used in diagnostic or clinical procedures.
<b>Batch No.:</b>	See product labels
<b>Antigen:</b>	The matrix metalloproteinases (MMPs) are a large family of zinc endopeptidases. All MMPs are synthesized as inactive proenzymes. The activation of these proenzymes is a critical step that leads to degradation of extracellular matrix components such as fibronectin and collagen type III. MMP2 is activated by other MMPs such as MMP14 and MMP16. MMP2 is known to degrade collagen types IV, V, VII and X as well as gelatin type I.
<b>Other Names:</b>	72 kDa type IV collagenase; EC 3.4.24.24; 72 kDa gelatinase; Matrix metalloproteinase-2; MMP-2; Gelatinase A; TBE-1; MMP2; CLG4A;
<b>Accession:</b>	P08253 MMP2_HUMAN;
<b>Specificity:</b>	Human MMP-2. This kit also shows reactivity with mouse MMP-2.
<b>Storage:</b>	Store at 2-8C
<b>Specific References:</b>	Abramov D (2017) Compositions and Methods for Treating Post-Operative Complications of Cardiopulmonary Surgery. United States Patent Application 20170354722 Application: Human blood.
<b>Kit components:</b>	The ELISA kit box contains 2 x 96-well pre-coated strip plates, protein standards, detection reagents, substrate buffer and detailed protocols.
<b>Range:</b>	156 pg/mL - 10,000 pg/mL
<b>Sensitivity:</b>	< 10 pg/ml
<b>Kit protocol:</b>	Please refer to our online product listing for current protocol/MSDS versions.
