

Rat Insulin-like growth factor I ELISA Kit (2 plates)

Catalogue No.:	BEK-2150-2P
Description:	The rat Insulin-like growth factor I (IGF-I) Kit is a sandwich ELISA. The capture antibody is a monoclonal rat IGF-I antibody pre-coated onto the 96-well strip plates provided in the kit. Rat test samples and standards of known IGF-I concentration are added to these wells and allowed to complex with the bound IGF-I antibody. A biotinylated rat IGF-I polyclonal antibody is then added. This detection antibody binds to the antigen thus completing the sandwich. After washing, an enzyme Avidin-Biotin-Peroxidase complex (ABC) is added which binds to the second antibody. The peroxidase substrate TMB is added to induce a coloured reaction product. The intensity of this coloured product is directly proportional to the concentration of IGF-I present in the samples. The purpose of this kit is the in-vitro quantitative determination of rat IGF-I in samples such as sera, plasma, tissue lysates and cell culture supernates. This kit has been configured for research use only and is not to be used in diagnostic or clinical procedures.
Batch No.:	See product labels
Other Names:	IGFI; Igf1; IGF-I; IGF-1; IGF1; Insulin-like growth factor 1;
Accession:	P08025 IGF1_RAT;
Specificity:	Rat Insulin-like growth factor I.
Cross-reactivity:	The cross reactivity with IGF-2 is < 1%.
Storage:	Store at 2-8C
Specific References:	Duarte Al. et al. (2018) "Dual Therapy with Liraglutide and Ghrelin Promotes Brain and Peripheral Energy Metabolism in the R6/2 Mouse Model of Huntington's Disease." <i>Sci Rep.</i> 8(1):8961. Application: Rat cortex homogenate. Candeias E. et al. (2017) "Brain GLP-1/IGF-1 Signaling and Autophagy Mediate Exendin-4 Protection Against Apoptosis in Type 2 Diabetic Rats." <i>Mol Neurobiol.</i> [Epub ahead of print]. A quantitative analysis in time course." <i>Exp Neurol.</i> 279:138-148. Application: Rat muscle tissue lysate.
Kit components:	The ELISA kit box contains 2 x 96-well pre-coated strip plates, protein standards, detection reagents, substrate buffer and detailed protocols.
Range:	62.5 pg/mL - 4,000 pg/mL
Sensitivity:	< 5 pg/ml
Kit protocol:	Please refer to our online product listing for current protocol/MSDS versions.
