

Human Soluble Vascular Endothelial Growth Factor receptor 1 / sVEGFR1 ELISA Kit (2 plates)

Catalogue No.: BEK-2162-2P

Description: The human Vascular Endothelial Growth Factor receptor 1 (VEGFR1) Kit is a sandwich ELISA. The capture antibody is a monoclonal human VEGFR1 antibody pre-coated onto the 96-well strip plates provided in the kit. Human test samples and standards of known VEGFR1 concentration are added to these wells and allowed to complex with the bound VEGFR1 antibody. A biotinylated anti-human VEGFR1 polyclonal antibody is then added. This detection antibody binds to the antigen thus completing the sandwich. After washing, an enzyme Avidin-Biotin-Peroxidase complex (ABC) is added which binds to the second antibody. The peroxidase substrate TMB is added to induce a coloured reaction product. The intensity of this coloured product is directly proportional to the concentration of VEGFR1 present in the samples. The purpose of this kit is the in-vitro quantitative determination of human VEGFR1 in samples such as sera, plasma, tissue lysates and cell culture supernates. This kit has been configured for research use only and is not to be used in diagnostic or clinical procedures.

Batch No.: See product labels

Antigen: Recombinant sVEGFR1 amino acids 27-687 (located in the ECD domain region) produced in and purified from a sf21 insect culture system.

- Other Names:** vascular permeability factor receptor; Tyrosine-protein kinase receptor FLT; Tyrosine-protein kinase FRT; Fms-like tyrosine kinase 1; VEGFR-1; FLT1;
- Accession:** P17948 VGFR1_HUMAN;
- Produced in:** Standard is produced in sF-21 insect cells.
- Molecular Weight:** Standard runs as a 100 kDa band on gels.
- Specificity:** Human Vascular Endothelial Growth Factor receptor 1
- Cross-reactivity:** Human sVEGFR1 isoforms, possibly primate sVEGFR1 (untested), homology to mouse, rat, chicken sVEGFR1 proteins less than 80% across the immunogen used.
- Storage:** Store at 4°C
- Kit components:** The ELISA kit box contains 2 x 96 pre-coated strip plates, protein standards, detection reagents, substrate buffer and precise instructions.
- Range:** 156 pg/ml - 10,000 pg/ml
- Sensitivity:** < 4 pg/ml
- Kit protocol:** Please refer to our online product listing for current protocol/MSDS versions.

IX: Typical Standard Curve (for reference only, not to be used for actual data)

Concentration pg/ml	0.0 pg/ml	156 pg/ml	312 pg/ml	625 pg/ml	1250 pg/ml	2500 pg/ml	5000 pg/ml	10000 pg/ml
O.D.	0.104	0.147	0.181	0.269	0.424	0.712	1.286	2.230

This standard curve is for demonstration purposes only. A standard curve should be generated for each assay.
