

Mouse monoclonal antibody to human Fucosyltransferase 10 [4H3]: IgG

Catalogue No.:	M-910-100
Description:	Fucosyltransferase 10 is a probable fucosyltransferase that localises to the golgi apparatus, the Golgi stack membrane. It is a single-pass type II membrane protein. There are 7 named isoforms produced by alternative splicing.
Batch No.:	See product label
Unit size:	100 ug
Antigen:	Recombinant human Fucosyltransferase 10, isoform 7 [1-92], with a GST tag.
Clone:	4H3
Other Names:	Alpha-(1;3)-fucosyltransferase 10; Galactoside 3-L-fucosyltransferase 10; FucT-X; Fuc-TX; FUT10
Accession:	FUT10_HUMAN
Produced in:	Mouse
Purity:	Protein G purified immunoglobulin
Applications:	This antibody is recommended for WB and sandwich ELISA. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	Specificity has been confirmed by WB and ELISA against the antigen.
Cross-reactivity:	Human. Other species have not been tested.
Form:	Lyophilised from PBS pH 7.2
Reconstitution:	Reconstitute in 100 uL of sterile water. Centrifuge to remove any insoluble material.
Storage:	After reconstitution keep aliquots at -20C for higher stability or at 2-8C with an appropriate antibacterial agent. Glycerol (1:1) may be added for additional stability. Avoid repetitive freeze/thaw cycles.
Expiry Date:	12 months after purchase

Western blot detection of GST tagged recombinant human Fucosyltransferase 10. Note the GST tag alone is 26 kDa.
