

Rabbit polyclonal antibody to human Estrogen Receptor beta (27-50): Affinity purified

Catalogue No.:	R-1084-100
Description:	Estrogen Receptor beta (ESR2) belongs to the nuclear hormone receptor family. ESR2 binds estrogens with high affinity, similar to Estrogen Receptor alpha (ESR1). At least 8 isoforms of ESR2 are produced by alternate splicing.
Batch No.:	See product label
Unit size:	100 ug
Antigen:	A synthetic peptide (HGSYIPSSYVDSHHEYPAMTFYS) corresponding to a region (27-50) from human Estrogen Receptor beta. To enhance the immunological response, this peptide was coupled to carrier protein BSA.
Other Names:	ER-beta; Nuclear receptor subfamily 3 group A member 2; ESR2; ESTRB; NR3A2;
Accession:	Q92731 ESR2_HUMAN;
Produced in:	Rabbit
Purity:	Affinity purified on antigen column
Applications:	Western Blotting (WB). A concentration of 0.5-1.0 ug/mL is recommended for WB. Human Estrogen Receptor beta (isoform Beta-1) has a predicted length of 530 residues and MW of 59 kDa. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
Specificity:	The specificity of this antibody has been confirmed by WB against the antigen.
Cross-reactivity:	Human. The antibody is predicted to react with rat due to sequence homology.
Form:	Lyophilised with 5mg BSA, 0.9mg NaCl, 0.2mg Na ₂ HPO ₄ , 0.05mg Thimerosal, 0.05mg NaN ₃
Reconstitution:	Reconstitute in 100 uL of sterile distilled water to achieve an antibody concentration of 1 mg/mL. Centrifuge to remove any insoluble material.
Storage:	At least 12 months after purchase at 2-8C (lyophilized formulations). After reconstitution, aliquot and store at -20C for a higher stability. Avoid freeze-thaw cycles
Expiry Date:	12 months after purchase
